- Sinchon Station (Line 2, Exit 1 or 3, 15-minute walk)
- Yonsei University or Severance Hospital Bus Stops (less than 5-minute walk)
- Inside Yonsei University and Severance Hospital (10-minute walk from Severance Hospital Main Gate)

## Workshop Overview

The KCS Cadaveric Robotic Surgical Workshop is designed to provide step-by-step, hands-on training in robotic surgery techniques used in **Functional and Reconstructive Urology (FRU)**. Participants will gain valuable experience from both **fundamental to advanced procedures**, under the guidance of internationally recognized faculty.

## Program Contents (Hands-on Procedures)

- Robotic Simple Prostatectomy (RASP)
- Robotic Sacrocolpopexy (Robotic Scarohysteropexy, RSH)
- Robotic Fistula Repair (Vesico-vaginal (VV) fistula)
- Robotic Artificial Urinary Sphincter (AUS) Implantation

*Note: Program contents may vary depending on group assignments, instructors, and cadaver conditions on the day of the workshop.*
